

An overview of the A&P Process at the UW School of Medicine

Ian Bennett MD PhD – ibennett@uw.edu

Professor, Family Medicine & Psychiatry and Behavioral Sciences

Adjunct Professor, Department of Global Health

Chair, SOM Council on Appointments and Promotion

4/2022

Goal of this presentation

- > **To have an understanding of the A&P Process at the School of Medicine**
- > **To add transparency to the process to reduce any concerns**
- > **To help you prepare for an upcoming promotion and promote success**
- > **Disseminate information regarding efforts to ensure equal access to appointments and promotion to populations historically underrepresented**

Promotion Process

- > **Departments prepare packets and may have meetings to provide feedback to candidate**
 - Contents of packet are not described here but include CV, personal statement, teaching reviews (peer and student), clinical reviews, internal and external letters, etc.
- > **Voting department faculty of equal or higher rank will vote or abstain on faculty promotion packet**
 - Department Chair writes high level letter summarizing the packet and departmental support – including results of vote
- > **A&P Council reviews packet and results of review are added to packet**
- > **Dean approves packet**
- > **UW Provost approves packet**
- > **Promotion approved**

Available Resources

- > **UW Faculty Code**
 - <https://bit.ly/UWFacultyCodePromotions>
- > **UW School of Medicine A&P Guide**
 - <https://bit.ly/UWSoMAPGuide>
- > **Special though Spring 2022 – Covid-19 voluntary clock stoppage**
 - <https://bit.ly/UWCovidExtension>
- > **Faculty Promotion Website**
 - <https://faculty.uwmedicine.org/promotions/>

A&P Committees

- > Each department has an A&P Committee that votes on appointment, promotion and the criteria that defines them**
- > If committee is separate from all faculty, there will be a vote by all voting faculty in the department**
- > Those criteria are specific to a department and approved by the A&P Council and the School of Medicine**

School of Medicine A&P Council

- > One of several governance 'councils' from the school**
- > Composed of Professors who are not Department Chairs**
- > Review by 'peers' but not from the same department**
- > May be observed by ex-officio non-voting members**
- > Brings together 31 departmental criteria, SOM Guidelines and reviews**
- > Reviews for consistency with School of Medicine, UW Faculty Code and harmonizes the process**
- > All Council communications are confidential**

Some high level data

- > **Council reviews around 120-150 promotions per year**
- > **For the vast majority of packets, the committee really celebrates the success of the faculty member**
 - **As a committee member – this is very satisfying, it is amazing to see all the awesome work our faculty are doing**
 - **When you are promoted to Professor, please consider volunteering to be considered for election**
- > **A small percentage (7% or less) are more challenging and require more discussion**

Non Mandatory Promotions

———— Mandatory vs Non-mandatory Promotions

- > **For Assistant Professors, promotion to Associate before the sixth year is Non-mandatory**
- > **The Faculty Code states that promotion should not be defined only by time in rank**
- > **It is normal to go up on the normal timeline and going up as non-mandatory should be unusual**
- > **Non mandatory promotions should show a strong trajectory while in rank (which requires time) and to clearly exceed departmental minimum criteria**
 - **Discuss with your chair but in general these promotions should be unusual**

How do Council reviewers review?

- > **Each packet has a primary and secondary reviewer**
- > **The primary reviewer fills out a template**
 - Candidate name and other basic information (dept, etc)
 - Promotion being proposed
 - Departmental faculty vote
 - Educational Background
 - Research
 - Teaching
 - Clinical
 - Service
 - Letters of evaluation
 - Contributions to Equity, Diversity and Inclusion
 - Professionalism
 - Assessment and Recommendation

The criteria and packet size can be daunting but it doesn't have to be

- > **You don't have to be equally excellent in all domains**
 - Depends a lot on your track and activities
 - Read departmental criteria carefully
 - Discuss with your chair
- > **If not formal, I highly recommend leveraging your informal mentor network of faculty**

Things to watch out for

Pitfalls in the process

- > **"No" votes in the department**
- > **More than one unfavorable referee letter**
- > **Poor teaching reviews and no sign of improvement**
- > **Comments related to unprofessional conduct**
- > **Lack of demonstrated independence**
- > ***Lack of an upward trajectory***

A strong Chair letter is very helpful

Well organized and strong

- > **Address all of the key areas of promotion**
- > **Explain areas that are not routine**
 - Weaknesses that are made up for in another way
 - Non-traditional scholarship
 - Contributions to the function of the department
 - Problems with letters of support or evaluations
 - > Showing trajectory of improvement
- > **Call out specific strengths that should be highlighted**

The Self Assessment is Deeply Important

- > Tell your story / journey to get you here
- > Paint the other story that ties your CV and rest of your portfolio together
- > Don't just repeat items that will be in your chair's letter

- > Some advice:
 - Being an Assistant Professor is my favorite period of my career, lots of doing what I love and why I got into research
 - As an Assistant Professor, resist getting distracted by things that take time but don't contribute to your promotion
 - Get strong, unfiltered feedback halfway through (at about 3 years)

Forms of scholarship

- > Sometimes scholarship can be nontraditional in a field
- > For example, Conference Proceedings in informatics are full journal papers and can be significantly more competitive than journal papers
- > Indicate this in Self Assessment or Chair's letter

Pacific Symposium on Biocomputing 3:18-29 (1998)

REVEAL, A GENERAL REVERSE ENGINEERING ALGORITHM FOR INFERENCE OF GENETIC NETWORK ARCHITECTURES

Demonstrating Independence

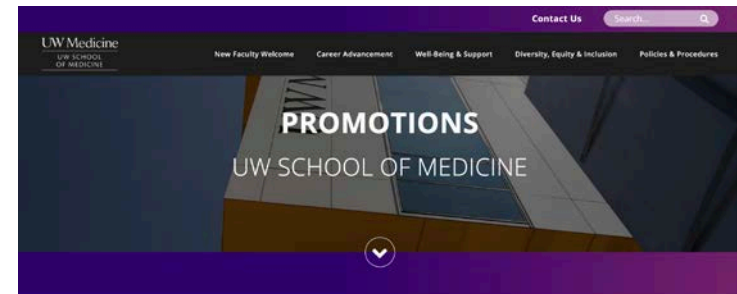

- > Required in some but not all pathways/tracks**
- > Tension between independence and value to program/laboratory/collaboration**
- > Clear enunciation of the candidate's contribution and impact on a scientific program is essential**
- > First and senior author publications are important, PI of grants, invites to give national seminars, etc. all good evidence of independence**
- > Highlight in Self Assessment**

Last slide advice

- > **Most candidates are promoted with few, if any, issues**
- > **Spend time on the self assessment**
 - Be clear about your strengths
 - Acknowledge (major) weaknesses
 - Include something about your future plans
- > **Promotion is institution's affirmation of your long term value and potential**

- > **Use the promotion website:**
<https://faculty.uwmedicine.org/promotions/>

Assistant Professor Timeline / Years 1-6
