

# **The UW School of Medicine Appointments and Promotions Council**

## **Overview of process and What it means for you**

---

**KAREN STOUT, MD**

**PROFESSOR, DIVISION OF CARDIOLOGY, DEPARTMENT OF MEDICINE**

**ADJUNCT PROFESSOR, DEPARTMENT OF PEDIATRICS**

**CHAIR, SCHOOL OF MEDICINE APPOINTMENT AND PROMOTIONS COUNCIL**

# Why care about the School A & P council?

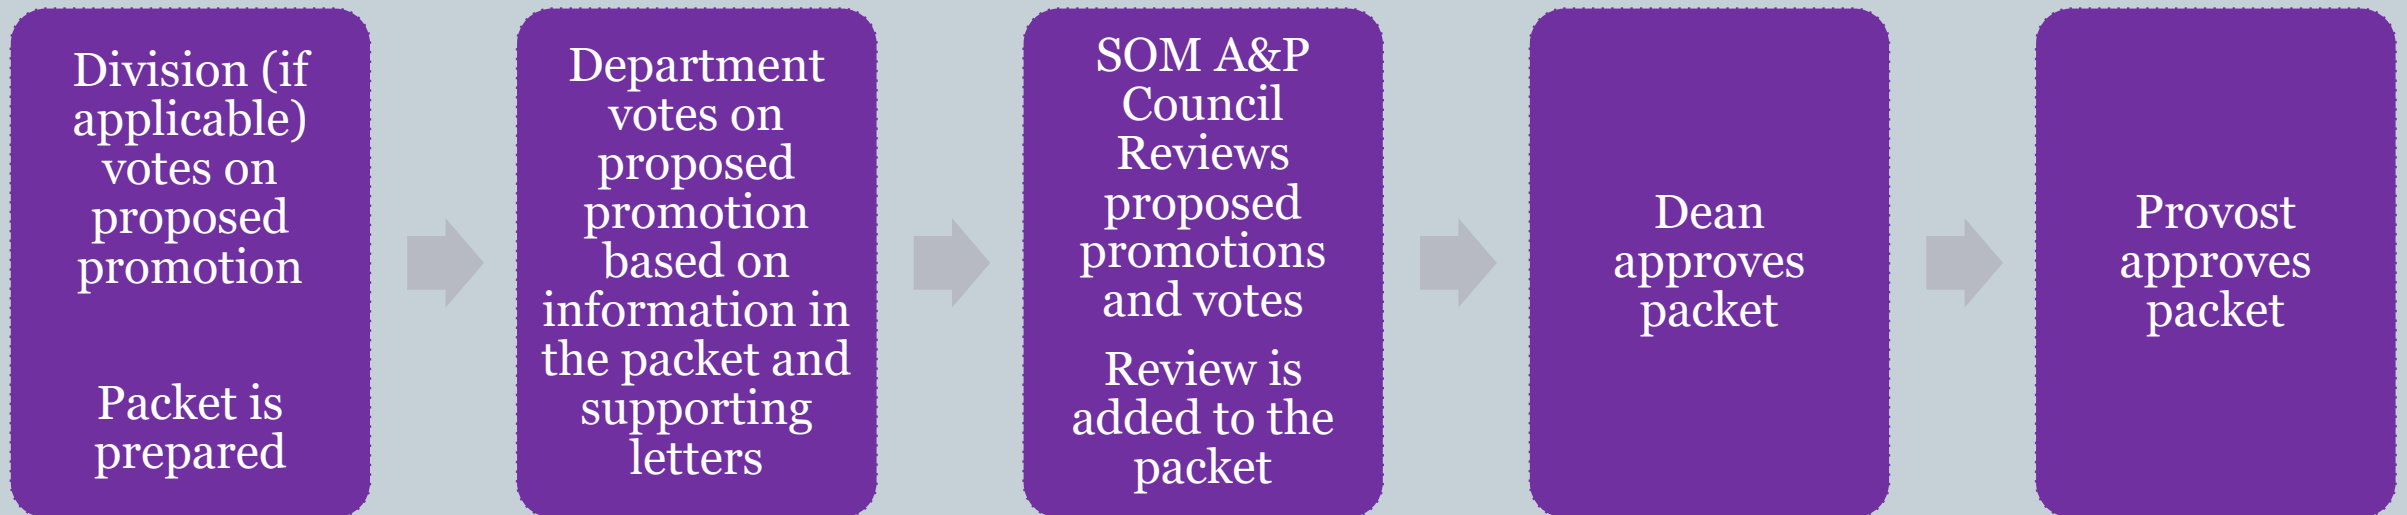

---

**Because to be promoted, it is a key step in the process**

**Understanding the process will help you navigate your promotions or provide counsel/mentorship to others**

**Add transparency and resources for questions**

# Promotion Process

# Promotion Process

# Appointment and Promotion Committees

---

**Departmental Appointment and Promotion Committees help define criteria for appointment and promotion**

**Those criteria have commonalities as dictated by Faculty Code and the SOM**

**They are otherwise unique to the Department**

**Are approved by A&P Council and the SOM**

**All Department voting faculty vote on appointments and promotions (based on rank)**

# School of Medicine A & P Council

**One of a few “governance councils” in the SOM**

**Professors who are not Department chairs**

**not more than one per Department, regardless of Department size**

**It serves as peer review on behalf of the SOM, outside of the home Department**

**Is observed by ex-officio (non voting) members**

**Communications are confidential**

# What do we look at?

**Promotion criteria for 32 Departments, SOM Guidelines, UW Faculty Code**

**Individual faculty packets, including CV, letters, evaluations, personal statements**

**Each packet is reviewed by two members, one primary, one secondary**

**Review template filled out, will become part of the packet**

# Information in the Review Template

*the review is DETAILED, everything is looked at*

---

**Candidate name and other basic information (dept, etc)**

**Promotion being proposed**

**Departmental faculty vote**

**Educational Background**

**Research**

**Teaching**

**Clinical**

**Service**

**Letters of evaluation**

**Contributions to Equity, Diversity and Inclusion (optional)**

**Professionalism**

**Assessment and Recommendation**

## School of Medicine A & P Council

---

**170-190 promotions per year, reviewed in fall/winter (this year will be 190)**

**The vast majority only celebrate the faculty member accomplishments**

**Over 90% of packets are clearly outstanding or routine, thus do not require in depth discussion**

**<7% are challenging and require discussion**

# What do you mean by “challenging”????

**Significant number of no votes in division or department**

**More than one unfavorable referee letter**

**Poor evaluations without evidence of improvement**

**Professionalism concerns**

**Lack of clearly demonstrated independence**

**Unexplained variability**

**Concerns that some aspect of promotion criteria are not met**

**Trajectory**

**SOME RELATIVELY COMMON ISSUES THAT ARISE  
THAT HAVEN'T ALREADY BEEN DISCUSSED**

# Trajectory Might Matter And takes time to demonstrate

**Non-mandatory = assistant to associate before year 6**

**Early should be unusual, not the expectation**

**Non-mandatory need evidence of a strong, obvious upward trajectory (which takes time)**

# Your Self-Assessment A & P Council

Tell us about your career as if we have NO IDEA about your specialty/expertise – because we generally don't!!!  
It should add perspective to what will be in Chair's letter and outside referee letters

What I (we)

Some alligators can grow up to 15 feet.

So I plan to next

But most only have 4.

Emphasize your strengths & acknowledge weaknesses

# Forms of scholarship

Sometimes scholarship can be nontraditional in a field

For example, Conference Proceedings in informatics are full journal papers and can be significantly more competitive than journal papers

Indicate this in Self Assessment or Chair's letter

*Pacific Symposium on Biocomputing 3:18-29 (1998)*

**REVEAL, A GENERAL REVERSE ENGINEERING ALGORITHM  
FOR INFERENCE OF GENETIC NETWORK ARCHITECTURES**

SHOUDAN LIANG

*SETI Institute, NASA Ames Research Center,  
Moffett Field, CA 94035 (sliang@mail.arc.nasa.gov)*

STEFANIE FUHRMAN, ROLAND SOMOGYI

*Molecular Physiology of CNS Development, LNP/NINDS/NIH, 36/2C02, Bethesda, MD

[PDF] [Reveal, a general reverse engineering algorithm for inference of genetic network architectures](#)

[S Liang, S Fuhrman, R Somogyi - ... symposium on biocomputing, 1998 - lacim.uqam.ca](#) 

Given the immanent gene expression mapping covering whole genomes during development, health and disease, we seek computational methods to maximize functional inference from such large data sets. Is it possible, in principle, to completely infer a complex ...

# Demonstrating Independence

**Required in some but not all pathways/tracks**

**Interdisciplinary work and “team science” make attribution of effort and the an individual’s contribution more difficult**

**Clear enunciation of the candidate’s contribution and impact on a scientific program is essential**

**First and senior author publications are important, PI of grants, invites to give national seminars, etc. all good evidence of independence**

**Highlight in Self Assessment**

Reviewers outside your Division/Department need context to understand success  
*Letters and personal statement provide context*

**PERSPECTIVE**

is almost impossible to achieve in a selfie

# How can you help yourself succeed in the process?

**Use your mentors! Talk to your Chair.**

**Understand your story in the context of promotion  
where it is 'usual' and where it isn't  
make sure we understand your unique contributions!**

**Know what is in your packet (aside from letters)  
highlight your strengths, own your weaknesses and your plan  
for improving**

**Know that most candidates are promoted with no issue**
